

AI Insights Terms

Last updated [22 January 2026](#)

1. Introduction

AI Insights is an interactive analysis tool offered by Altify. By accessing or using AI Insights, you agree to these specific terms in addition to the general Altify Terms of Service. These terms supplement the Altify Terms of Service. Where these terms address AI-specific matters (such as hallucination risks or data accuracy), they provide additional detail. In all other respects, including limitations of liability, warranties, dispute resolution, and indemnification, the [Terms of Service](#) apply in full.

2. Nature of the Service

AI Insights uses artificial intelligence models, including Google Gemini, to interpret natural language inputs and generate outputs by analysing market data sources.

- **Functionality:** The tool may describe objective criteria regarding securities, companies, or industries and research or filter securities based on your prompts.
- **Portfolio Analysis:** The tool may analyse your specific portfolio holdings to provide summarised drivers or news alerts.
- **Data Processing:** When you use AI Insights, your queries and portfolio information may be processed by Google Gemini. For details on data handling, see our [Privacy Policy](#).

3. No Investment Advice

Any output from AI Insights is for your informational and educational purposes only.

- **Not a Recommendation:** Output is not, and should not be construed as, individualised investment advice or recommendations by Altify.
- **No Fiduciary Duty:** The tool does not account for your individual financial goals, risk aversion, or specific circumstances.
- **Self-Directed:** You understand that your account remains self-directed and you are solely responsible for any investment decisions you make based on AI Insights.

4. Accuracy & Reliability

We do not guarantee the accuracy, completeness, relevance, or timeliness of any output.

- **"As Is" Basis:** All output is provided "as is" and your use of it is at your sole risk.
- **Verification:** You must independently evaluate and verify the accuracy of any output for your own use case, including through human review.
- **Market Data:** Output includes market data where the price and value of securities may fluctuate.

5. Artificial Intelligence Risks

AI Insights relies on rapidly evolving technology which entails specific risks. By using the tool, you acknowledge the following:

- **Hallucinations:** AI models have the potential to generate "hallucinations". This occurs when the model produces results that are plausible but factually incorrect, misleading, or unrelated to your original query.
- **Data Limitations:** The tool analyses data from third-party sources. This data may be subject to inaccuracies, errors, delays, or may be incomplete.
- **Bias:** AI models learn from datasets that may contain embedded historical biases which could affect the fairness and quality of the outputs.
- **User Input:** The accuracy of the output depends on the accuracy and completeness of your input. The AI may not interpret qualitative nuances or unstated assumptions.
- **AI Insights Operates Autonomously:** Outputs are generated in real-time without human review by Altify before being displayed to you.

6. Hypothetical Performance

If the tool displays historical performance or backtests, these are hypothetical in nature.

- **No Guarantee:** These results do not reflect actual investment results and are not guarantees of future performance.
- **Assumptions:** You should review the assumptions used to calculate any historical analysis.

7. Liability

To the fullest extent permitted by law, Altify will not be responsible for any losses that may result from your reliance on AI Insights output. We disclaim liability for system errors, software bugs, or algorithmic flaws that lead to delayed or inaccurate outputs.
